CONNECTING IDEAS

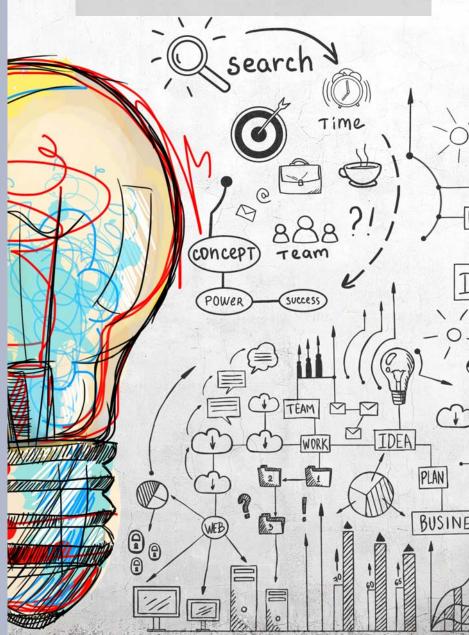

INNOVATIONS

motivated employees and innovative products, we are able to meet complex customer requirements at competitive prices within the shortest possible time.

With more than 60 highly Through continual investments in machinery and equipment, we are constantly able to adapt to the changing requirements of our customers and process the orders on time. Regular training of our employees proves our high quality standard and sets us apart from competitors.

For our customers, we are the reliable partner for implementing projects together.

Our efforts to achieve the best possible and continuous improvement of environmental protection are supported by the following principles:

 We attribute great importance to environmental protection in development and introduction of new products and processes.

• We underline the importance of an environmentally conscious commitment of the management as well as our employees.

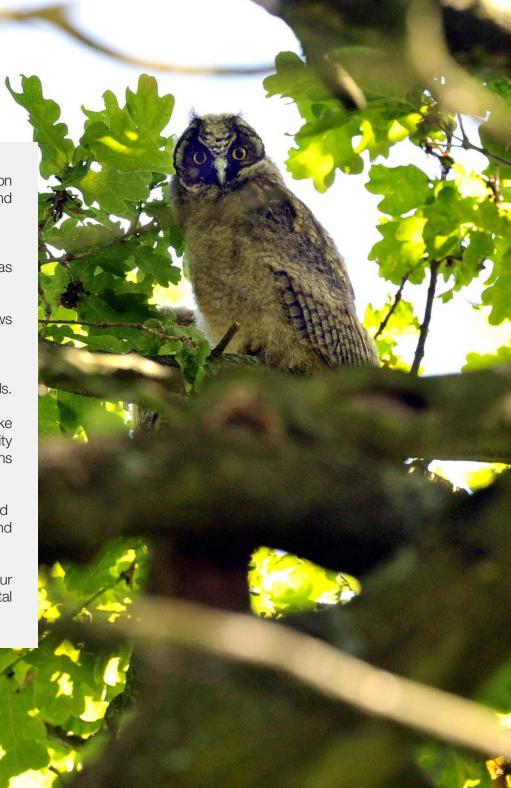

• We are committed to comply with all environmental laws and regulations.

• We minimize the amount of waste from packaging material and avoid environmentally problematic materials.

• Through intelligent arrangement of processes, we take all necessary measures to use energy (water, electricity and gas) sparingly, and to prevent or minimize emissions (wastewater, exhaust gases and waste heat).

 The way we align our activities guarantees a high and constantly evolving environmental standard today and in the future.

 In addition to our employees, we also involve all of our contract partners in the efforts to improve environmental protection measures.

OUR ENVIRONMENTAL TARGETS FOR THE **YEAR 2021**

In order to continuously improve our performance in environmental protection, we set ourselves new objectives every year.

- Energy saving through more energy-efficient lighting.
- · Waste reduction due to less packaging.
- Reduction of concrete residues.
- Use of reusable pallets (euro pallets and pallet cages).Digitisation of sales work to reduce travel paths to customers.

OUR INPUT / OUTPUT STATEMENT 2020

These are our key figures for electricity, heat energy, water, residual waste, and CO_2 emissions:

| INPUT | | OUTPUT | |
|------------------------|---------|----------------------------------|--------|
| Electricity (kWh) | 138.890 | CO ₂ from electricity | 55.695 |
| Gas (kWh) | 13.395 | CO ₂ from gas | 2.947 |
| Diesel (I) | 5.311 | CO ₂ from diesel | 3.809 |
| Petrol (I) | 612 | CO ₂ from petrol | 1.408 |
| Water (m³) | 1.029 | Waste water (m³) | 395 |
| Waste | | | |
| Residual waste (I) | 12.500 | | |
| Paper / cardboard (I) | 16.200 | | |
| Foil (I) | 8.750 | | |
| Concrete residues (m³) | 85 | | |
